Objective

Aptitude without Attitude is Blind;

Attitude without Aptitude is Lame.

In order to upscale the preparation and to provide a real-time experience for future placement aptitude tests, IChE-CSC organized an aptitude quiz with the primary objective of providing exposure of the initial rounds of placement drives to the freshmen year. However, it was open for students of all the years to test their knowledge.

Event Details

The quiz was conducted on 12th February, 2021. It commenced at 5:00 PM sharp and the platform for the same was Google forms. For sharing the link and addressing any queries of the participants, a WhatsApp group was created. The link for the quiz was shared in the group at 4:55 PM. It comprised of 30 multiple choice questions and the time allotted for completion was 30 minutes. Out of 30 questions, 27 questions carried 2 marks for correct answer and 0.5 marks were deducted for every incorrect answer. 3 questions, which weighed 4 marks for every correct answer with a negative marking of 1 mark for every incorrect answer, were meant to break ties. The quiz witnessed 126 total registrations which comprised of students from our department and colleges like UIET, SSN College of

Engineering, Nirma University etc. 72 students were able to successfully submit their responses within the allotted time.

Feedback

The quiz aimed at providing a rough idea to students for the upcoming internships and placement opportunities. Everyone who attempted the quiz found it very helpful and informative. Some students found it challenging to submit their responses well within time and hence suggested extra time should have been allotted for submission. Majority of the participants were of the opinion that events like these should be conducted more often.
